Hello,

My name is Ashley and I currently just moved to the town of Amherst! I am an avid plant grower and cultivator so it is very important for me to know what I am giving my plants! especially ones that are for consumption!!

I would like to request a report of our town water. It is important to know the amount of fluoride, calcium and chlorine levels to make sure these compounds do not cause any adverse reactions! Fluoride especially does accumulate in the body and will also kill plants! ! I am also aware I can send in a sample to be tested as well!

Thank you, Kind regards
