To Whom it may concern,

While conservation is considered very important, your billing system does not reward conservation. I understand you have to place a minimum billing value, however, I don't think this (9,000 gallons) reflects the average single or 2 person household in Erie County and this can create a financial burden.

I submitted by meter reading and it is nowhere near the amount of the estimated bills I have been paying for the past 12 months. Off by at least 12,000 gallons.

I would ask you to please consider lowering the minimum billing volume even 10%.

Please kindly forward this to the correct person for review.

Sincerely Debora Wild.
